

# AGA owners become entertaining people.

Oil or gas fired—AGA makes it all so easy!

## AGA insulating lids...

Retain the heat and keep your Aga ready for immediate use.

## Super fast hotplate...

big enough for three stew-pans—and so fast that even green vegetables retain their vibrant colour.

## Housetrained...

Aga ovens and plates are completely self-cleaning. Just brush out occasionally. And what's more—your AGA can provide lots of hot water for baths and washing up.

## The works...

The burner control—Aga constant heat is automatically controlled. You just set, and forget!

## Simmering plate...

is just right for slow, gentle cooking—will help you to coax delicate sauces and gravies to a perfect conclusion.

## The joy of instant heat...

Two giant ovens—both at the ready for you always. One is fast, the other slow. So you can be roasting the joint and making the meringues, at the same time.

## The heat-storage system...

means that your ovens are constantly hot, so all the juices are instantly sealed into your food when you pop it into the oven. And heat-storage means that the moisture is retained in the food so there's minimum shrinkage—you get more meat for your money that way!

## What to do.

Just fill in the coupon and our FREE AGA BOOKLET will be sent to you. It's in full glorious colour and tells you all the exciting things about the Aga that we couldn't fit into this page. For example Aga Cookers now come in an exciting range of colours. Pale blue, dark blue, white, grey, pale green, dark green, cream, red, yellow. Get your coupon in the post TODAY—and get

Please send me all the facts about AGA cookers.
